ABOUT PANELWAY FITNESS

Built for Commercial Fitness

Panelway Fitness supplies commercial strength and fitness equipment for distributors, gym owners, fitness brands, project contractors, hotels, studios and institutional facilities worldwide.

From individual strength machines to complete gym packages, we help international buyers build equipment ranges and fitness facilities around their market, budget and project requirements.

COMMERCIAL EQUIPMENT

Strength and fitness equipment configured for professional environments.

OEM / ODM SUPPORT

Frame colors, upholstery, branding and selected configurations.

EXPORT-READY DELIVERY

Inspection, packing, labeling and shipment preparation.

PARTNERSHIP

Why Choose Panelway

A practical manufacturing partner for commercial fitness projects and long-term distribution.

01 Commercial-Focused Range

Strength, functional, free-weight, cardio and supporting accessories for complete facilities.

02 Flexible OEM / ODM

Frame colors, upholstery, branding and product configuration for qualified orders.

03 Project-Oriented Support

Equipment selection based on facility size, training zones, target users and budget.

04 Quality-Control Process

Checks through production, assembly, functional inspection, packing and shipment preparation.

05 Export Experience

International packing, labeling, loading coordination and export-order support.

06 Long-Term Cooperation

Repeat-order manufacturing, spare-parts support and practical product continuity.

PROJECT SOLUTIONS

Complete Gym Solutions

From a product list to a coordinated facility package.

STRENGTH

Plate loaded and selectorized machines for full-body commercial training.

GLUTE & LEG

Specialized lower-body machines for high-demand training programs.

FREE WEIGHT

Racks, benches, dumbbells, plates, Olympic bars and storage.

FUNCTIONAL

Cable systems, functional trainers and multi-station equipment.

CARDIO

Treadmills, bikes, ellipticals, stair climbers, rowers and more.

One project can combine equipment, accessories, flooring and cardio products under a coordinated supply plan.

PROJECT APPLICATIONS

Solutions for Different Fitness Environments

COMMERCIAL GYMS

Broad equipment mix, high-use durability and complete strength / cardio zoning.

BOUTIQUE STUDIOS

Space-efficient strength, functional and specialty lower-body equipment.

HOTEL GYMS

Balanced cardio, selectorized strength and compact free-weight solutions.

APARTMENT & COMMUNITY

Practical equipment packages with efficient footprints and broad user appeal.

SCHOOL & INSTITUTIONAL

Durable, easy-to-manage training equipment with adaptable layouts.

PROJECT CONTRACTORS

Coordinated equipment sourcing for new-build and renovation projects.

PLANNING

Gym Packages by Project Size

Equipment quantity and layout depend on room geometry, target users, training concept and budget.

150 sqm

Compact Commercial / Boutique

Essential strength + functional + free weights + selected cardio

300 sqm

Balanced Commercial Gym

Expanded strength + dedicated free weights + functional + practical cardio

500 sqm

Full Commercial Facility

Multiple strength zones + broader cardio + glute / leg specialization

800 sqm+

Multi-Zone Professional Gym

High-capacity strength + multi-station + extensive cardio + tailored planning

CUSTOMIZATION

OEM / ODM Services

Build a product range that fits your brand, market and commercial positioning.

01 FRAME COLORS

Coordinate machine frames with brand identity or facility design.

02 UPHOLSTERY

Select seat, back-pad and roller-pad colors for a consistent range.

03 LOGO BRANDING

Private-label branding options for qualified commercial orders.

04 PRODUCT CONFIGURATION

Select models, features and combinations for your target market.

05 PACKAGING & LABELING

Project-specific identification and export packing arrangements.

OEM / ODM IS NOT SIMPLY A LOGO CHANGE.

It is a coordinated product and supply program.

Product selection, visual consistency, configuration, packaging and repeat-order support can be aligned around your market and customer base.

CAPABILITY

Manufacturing & Engineering

Commercial fitness equipment must perform reliably under repeated daily use.

01 Steel Cutting & Fabrication

02 Frame Welding & Reinforcement

03 Surface Preparation & Powder Coating

04 Upholstery & Pad Assembly

05 Moving-Part Assembly

06 Final Machine Assembly

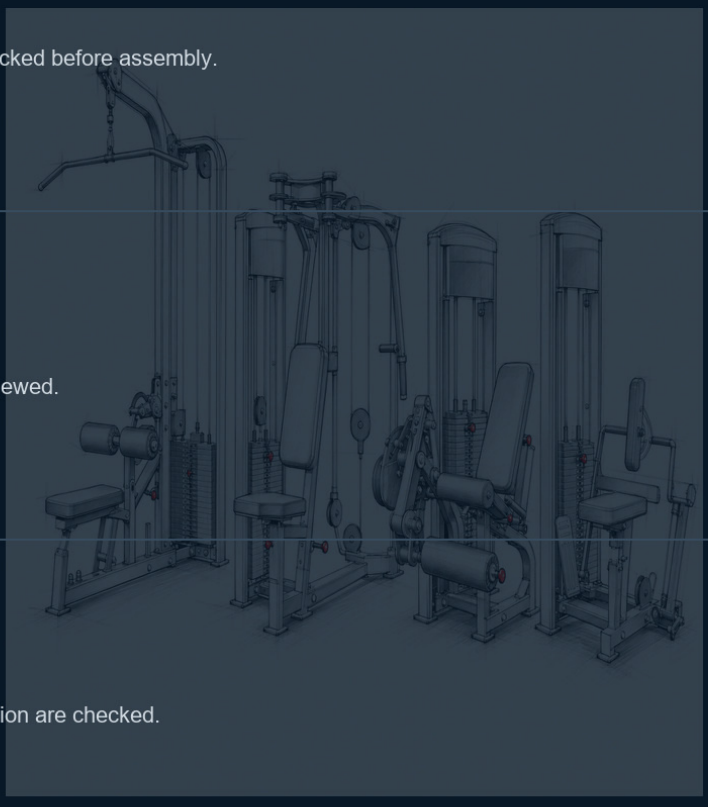

Designed around commercial use, international presentation and repeatable production.

QUALITY CONTROL

From Production to Packing

01 Material & Component Check

Key structural materials and purchased components are checked before assembly.

02 Frame & Finish Inspection

Welding, structure, surface finish and coating quality are reviewed.

03 Assembly & Functional Test

Moving parts, adjustments, cables, pulleys and exercise motion are checked.

04 Appearance & Detail Check

Upholstery, handles, labels, fasteners and visible surfaces are inspected.

05 Pre-Packing Confirmation

Machine configuration, accessories and packing requirements are confirmed.

EXPORT DELIVERY

Packing, Loading & After-Sales Support

International delivery starts with the right protection, identification and shipment preparation.

01
INSPECT

Confirm machine configuration, accessories and visible condition before packing.

02
PROTECT

Protect surfaces, moving components and loose accessories for international transport.

03
SHIP

Label, organize and prepare equipment for efficient container loading and delivery.

EXPORT PACKING

LABELING

CONTAINER LOADING

SPARE PARTS

Technical documents, installation guidance and spare-parts support can be provided for long-term cooperation.

FROM FACTORY FLOOR TO INTERNATIONAL DELIVERY

Prepared for export. Organized for handover.

COLLABORATION

A Clear Process from Requirement to Delivery

01

SEND YOUR REQUIREMENTS

Products, quantities, destination market, gym size and customization needs.

02

CONFIRM MODELS & SPECS

Suitable models, specifications, colors, branding and product combinations.

03

QUOTATION & ORDER

Price, quantity, delivery terms, packing and production details.

04

MANUFACTURING & QC

Production against confirmed requirements followed by inspection and checks.

05

PACKING & SHIPMENT

Packing, labeling, loading preparation and international shipment coordination.

COMPLETE GYM PROJECTS

We can also organize the equipment mix by training zone and facility size.
